

RHN Series Electric Wire Rope Hoists

Easy Maintenance Control Panel
IP55 protection with modern controls.
Components mounted on DIN rail.
Equipped with main line contactor.

Adjustable Geared Limit Switch
Operation of switch set for upper and lower block position and emergency limit.

RHN Protection Unit (RPU)
With motor management, overload cut-off and count hour meter.

Helical Gearing
Provides maintenance free, smooth and quiet operation.

Heavy Duty Cylindrical Motor
Fan cooled (TEFC) with class F insulation and a ribbed frame for maximum cooling and durability. High protection class IP55 and positive temperature control (PTC) thermal sensors.

Heavy Duty Electromagnetic Brake
Totally enclosed and fan cooled to ensure long life. Easy to inspect. 1 million cycles.

Load Limiter
Reduces the potential for making hazardous, over-capacity lifts. Overloading the hoist electrically activates the load limiter sensor, making hoist lifting inoperable.

Rope Drum
Designed for durability and long service life.

Graphite Cast Iron Rope Guide
Provides low wear and keeps the rope securely in the groove on the drum.

Premium Wire Rope
Provides high resistance to fatigue and wear.

Block Operated Limit Switch
Standard equipment. Secondary limit in the event the primary limit fails. Meets requirements of ASME B30.16, ASME HST-4, CMAA.

Bottom Block Sheaves
Cast iron for increased wire rope life.

RHN Series Electric Wire Rope Deck/Base Mounted Hoists

2-10 ton

Harrington's high performance RHN Series Deck / Base Mounted electric wire rope hoists feature a compact, modular design that is perfect for stationary applications or combined with a double girder trolley for double girder crane systems. The basic design is ideal for hoist retro-fits on existing crane applications.

Features and Benefits

Premium Wire Rope

Provides high resistance to fatigue and wear.

Graphite Cast Iron Rope Guide

Provides low wear and keeps the rope securely in the groove on the drum.

Load Limiter

Reduces the potential for making hazardous, over-capacity lifts. Overloading the hoist electrically activates the load limiter sensor, making hoist lifting inoperable.

Helical Gearing

Provides maintenance free, smooth & quiet operation.

Easy Maintenance Control Panel

IP55 protection with modern controls. Components mounted on DIN rail. Equipped with main line contactor.

Heavy Duty Electromagnetic Brake

Totally enclosed and fan cooled to ensure long life. Easy to inspect. 1 million cycles.

Heavy Duty Cylindrical Motor

Fan cooled (TEFC) with class F insulation and a ribbed frame for maximum cooling and durability. High protection class IP55 and positive temperature control (PTC) thermal sensors.

Bottom Block Sheaves

Cast iron for increased wire rope life.

Rope Drum

Designed for durability and long service life.

Adjustable Geared Limit Switch

Operation of switch set for upper and lower block position and emergency limit.

Block Operated Limit Switch

Standard equipment. Secondary limit in the event the primary limit fails. Meets requirements of ASME B30.16, ASME HST-4, CMAA.

RHN Protection Unit (RPU)

With motor management, overload cut-off and count hour meter.

Standard Hoist Specifications

Capacity Range

2 – 20 ton

Standard Voltage

208 / 230 / 460 / 575-3-60
RHN models are not reconnectable

Control Voltage

110V

Duty Cycle

30 / 10 min

Classification

ASME H4

RHN Series Electric Wire Rope Ultra-Low Headroom Trolley Hoists

2–15 ton

Harrington's RHN Series Ultra-Low Headroom trolley hoists combine our superior RHN hoist with an ultra-low headroom trolley and is the ideal solution for top running and underhung overhead bridge cranes. The compact body and short end approach result in the longest hook travel possible in facilities with limited usable space.

Features and Benefits

Rubber Trolley Bumpers

Standard feature on all trolleys. Provides protection from collisions. Complies with ASME standards.

Trolley Motor and Brake

Cylindrical motor with standard brake provides smooth, low-vibration acceleration and braking.

Built-In Drop Stops

Important feature provides additional security for the operator and the equipment.

Trolley Wheels

2 and 3 ton are operational on 3 1/4" patented track.

Premium Wire Rope

Provides high resistance to fatigue and wear.

Graphite Cast Iron Rope Guide

Provides low wear and keeps the rope securely in the groove on the drum.

Load Limiter

Reduces the potential for making hazardous, over-capacity lifts. Overloading the hoist electrically activates the load limiter sensor, making hoist lifting inoperable.

Helical Gearing

Provides maintenance free, smooth & quiet operation.

Easy Maintenance Control Panel

IP55 protection with modern controls. Components mounted on DIN rail. Equipped with main line contactor.

Heavy Duty Cylindrical Motor

Fan cooled (TEFC) with class F insulation and a ribbed frame for maximum cooling and durability. High protection class IP55 and positive temperature control (PTC) thermal sensors.

Heavy Duty

Electromagnetic Brake

Totally enclosed and fan cooled to ensure long life. Easy to inspect. 1 million cycles.

Bottom Block Sheaves

Cast iron for increased wire rope life.

Rope Drum

Designed for durability and long service life.

Adjustable Geared Limit Switch

Operation of switch set for upper and lower block position and emergency limit.

Block Operated Limit Switch

Standard equipment. Secondary limit in the event the primary limit fails. Meets requirements of ASME B30.16, ASME HST-4, CMAA.

RHN Protection Unit (RPU)

With motor management, overload cut-off and count hour meter.

Standard Hoist/Trolley Specifications
